

5TH AFRICAN PHILANTHROPY CONFERENCE 2024

THE NEXT FRONTIERS OF AFRICAN PHILANTHROPY

THEME: PHILANTHROPY AND TECHNOLOGY

**TOPIC: THE POTENTIAL IMPACT OF AI & BIG DATA FOR PHILANTHROPY
IN SUB-SAHARAN AFRICA**

Presenting Author: Mr. Patrick Ooro*

3rd African Philanthropy Academic Conference (APAC), 2024

Victoria Falls, Zimbabwe

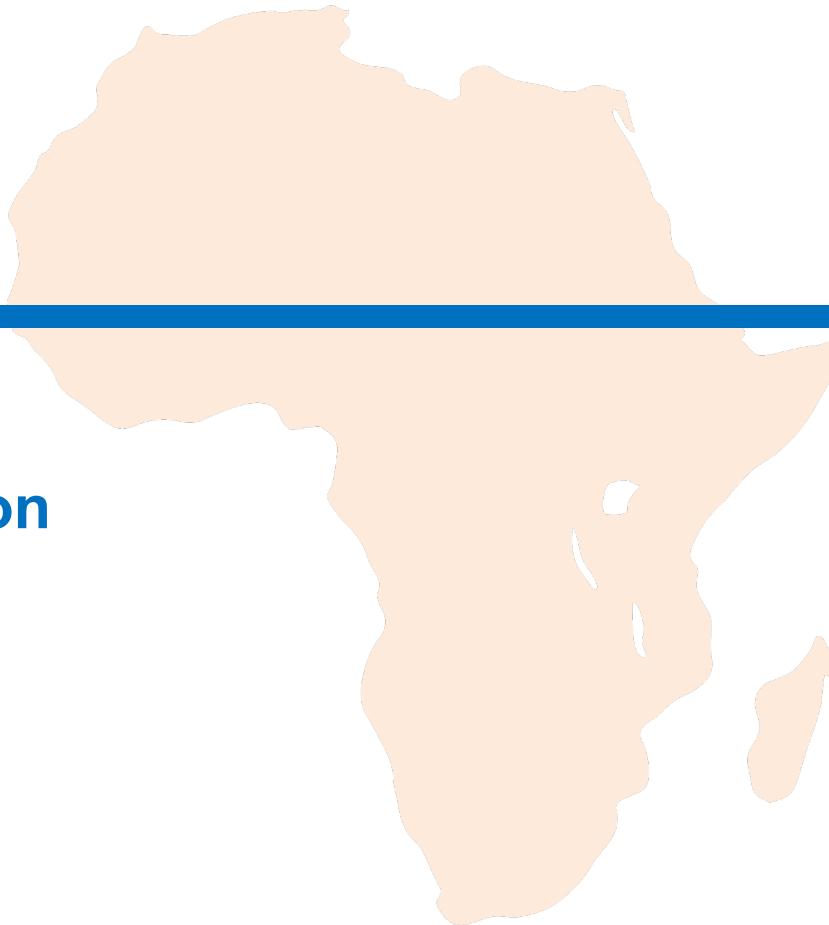

29th & 30th July 2024

5TH AFRICAN PHILANTHROPY CONFERENCE 2024

Contents

- 1. Introduction**
- 2. Approach & Methodology**
- 3. Findings, Discussions, & Conclusions**
- 4. Q & A**

5TH AFRICAN PHILANTHROPY CONFERENCE 2024

1. Introduction

Patrick Ooro (Co-Author & Presenter)

Qualifications:

- Google Data Analytics Professional Certificate
- Data Science Professional Certificate
- MBA
- BCom (Hons) (Economics)
- BA (Economics & Industrial Psychology)

Experience:

- Director, DaySeven Group, South Africa & Kenya
- Over 16 Years in Banking, Resources, Infrastructure, Management, Research, and Consulting
- <https://orcid.org/0009-0008-4323-0638>
- patrick@dayseven.africa

Kamau Ndwiga (Co-Author)

Qualifications:

- MBA
- BBA
- CPA (K)
- NDip. (Public Finance Management & Administration)

Experience:

- Researcher, First Advantage Consulting, Kenya
- Consultant, DaySeven Holdings, Kenya
- Over 25 Years in Accounting, Academic Research, NPO Consulting, Training & Development, Strategy, and M&E
- kamau@firstadvantageconsulting.com

Neo Raliphada (Co-Author)

Qualifications:

- MPhil (Business Management: Responsible Leadership)
- BA (Hons) SocSci (Psychology)
- BSocSci (Psychology)

Experience:

- Independent Researcher
- Over 16 years in NPO Management, Facilitation, Learning & Development; Business Development and Coaching Services.
- neoraliphada@gmail.com

Philanthropy in Africa needs to **Transform!**

- Approximately **72%** of Africans are below the age of **35 years** - **Youth**
- **Scale & Speed of Information Exchange – Impact!**

AI

- Rapid evolution - **Capabilities**
- Real-time analysis
- Integration
- Insights

Big Data

- **Any** piece of information
- **Large** amounts collected
- **Wealth** of information

African Philanthropy

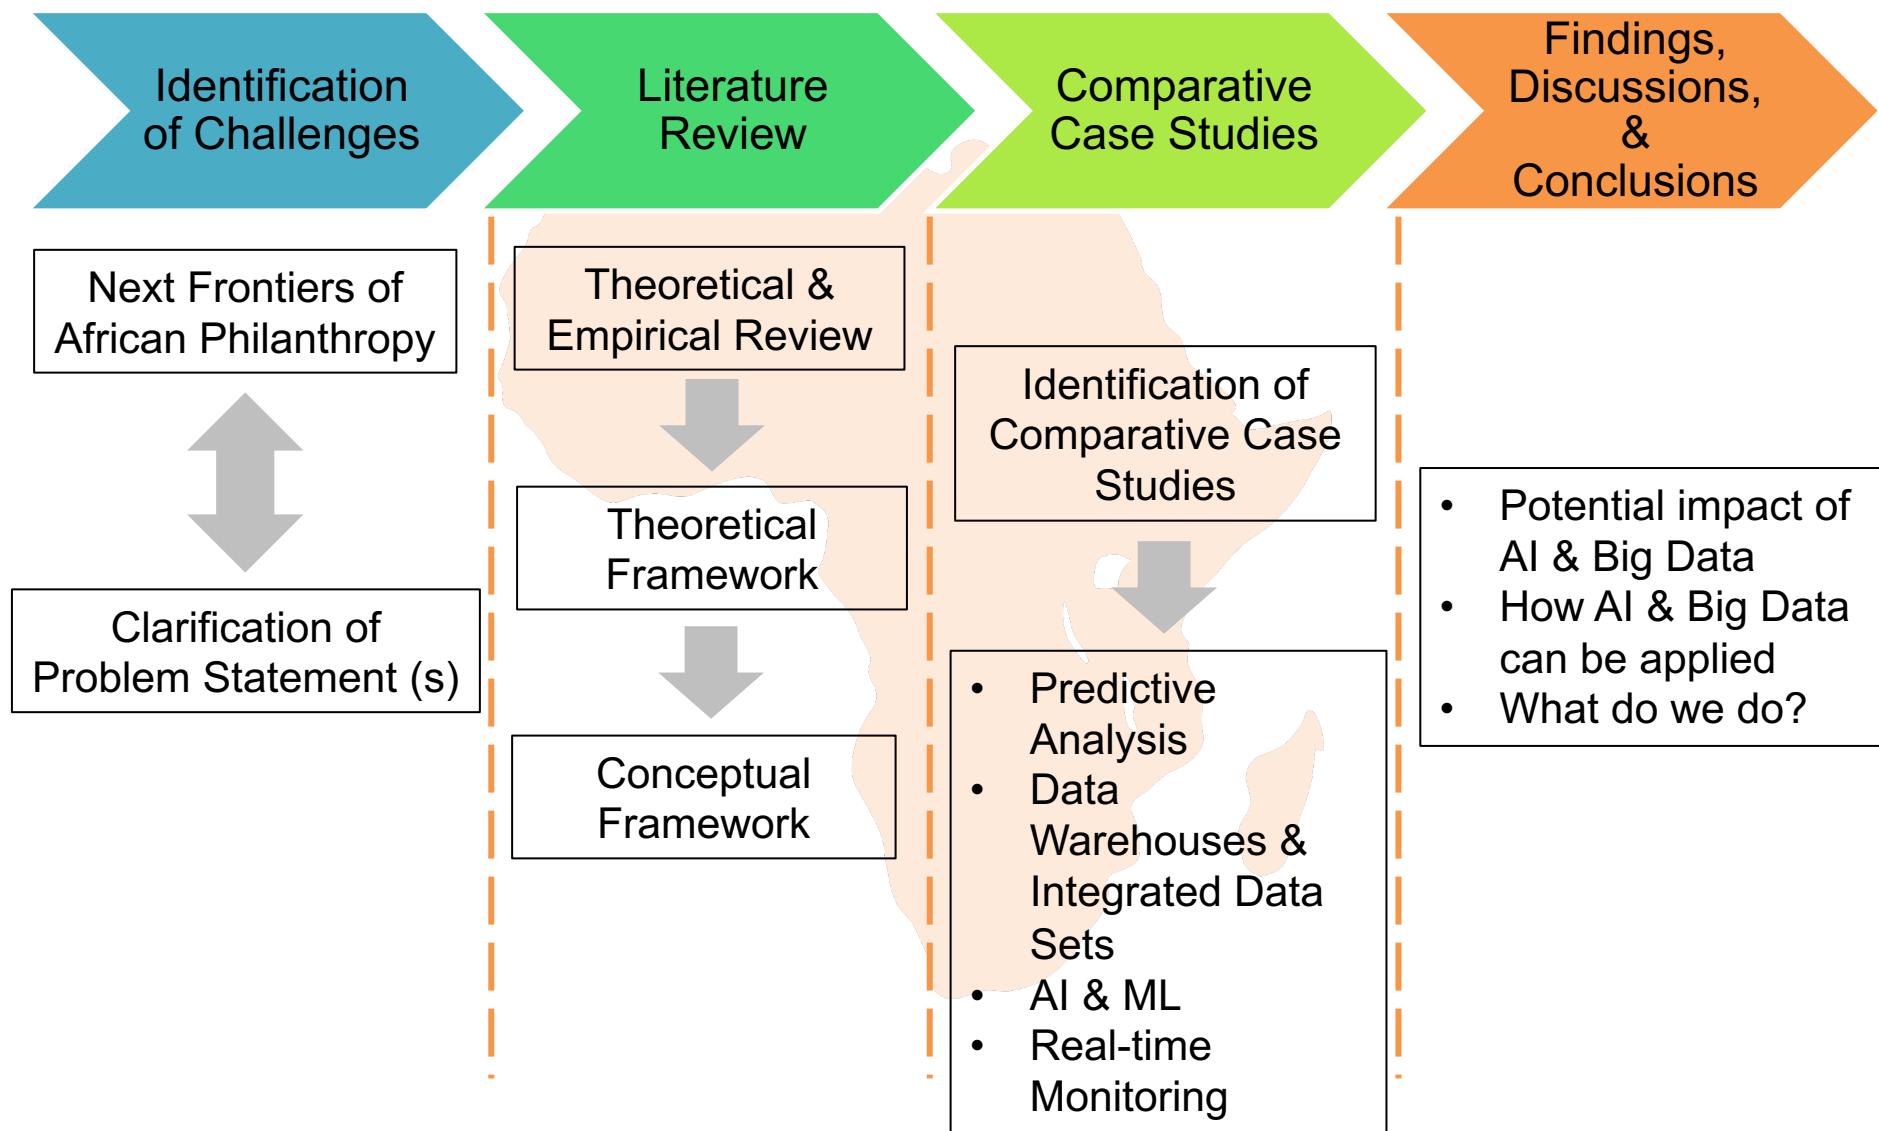

- Effectiveness
- Efficiency
- Impact
- Transparency

- **Predictive analysis** using algorithms
- Creating **data warehouses** and **integrated data sets**
- Applying **AI, Machine Learning (ML)** tools and techniques
- **Real-time monitoring**

5TH AFRICAN PHILANTHROPY CONFERENCE 2024

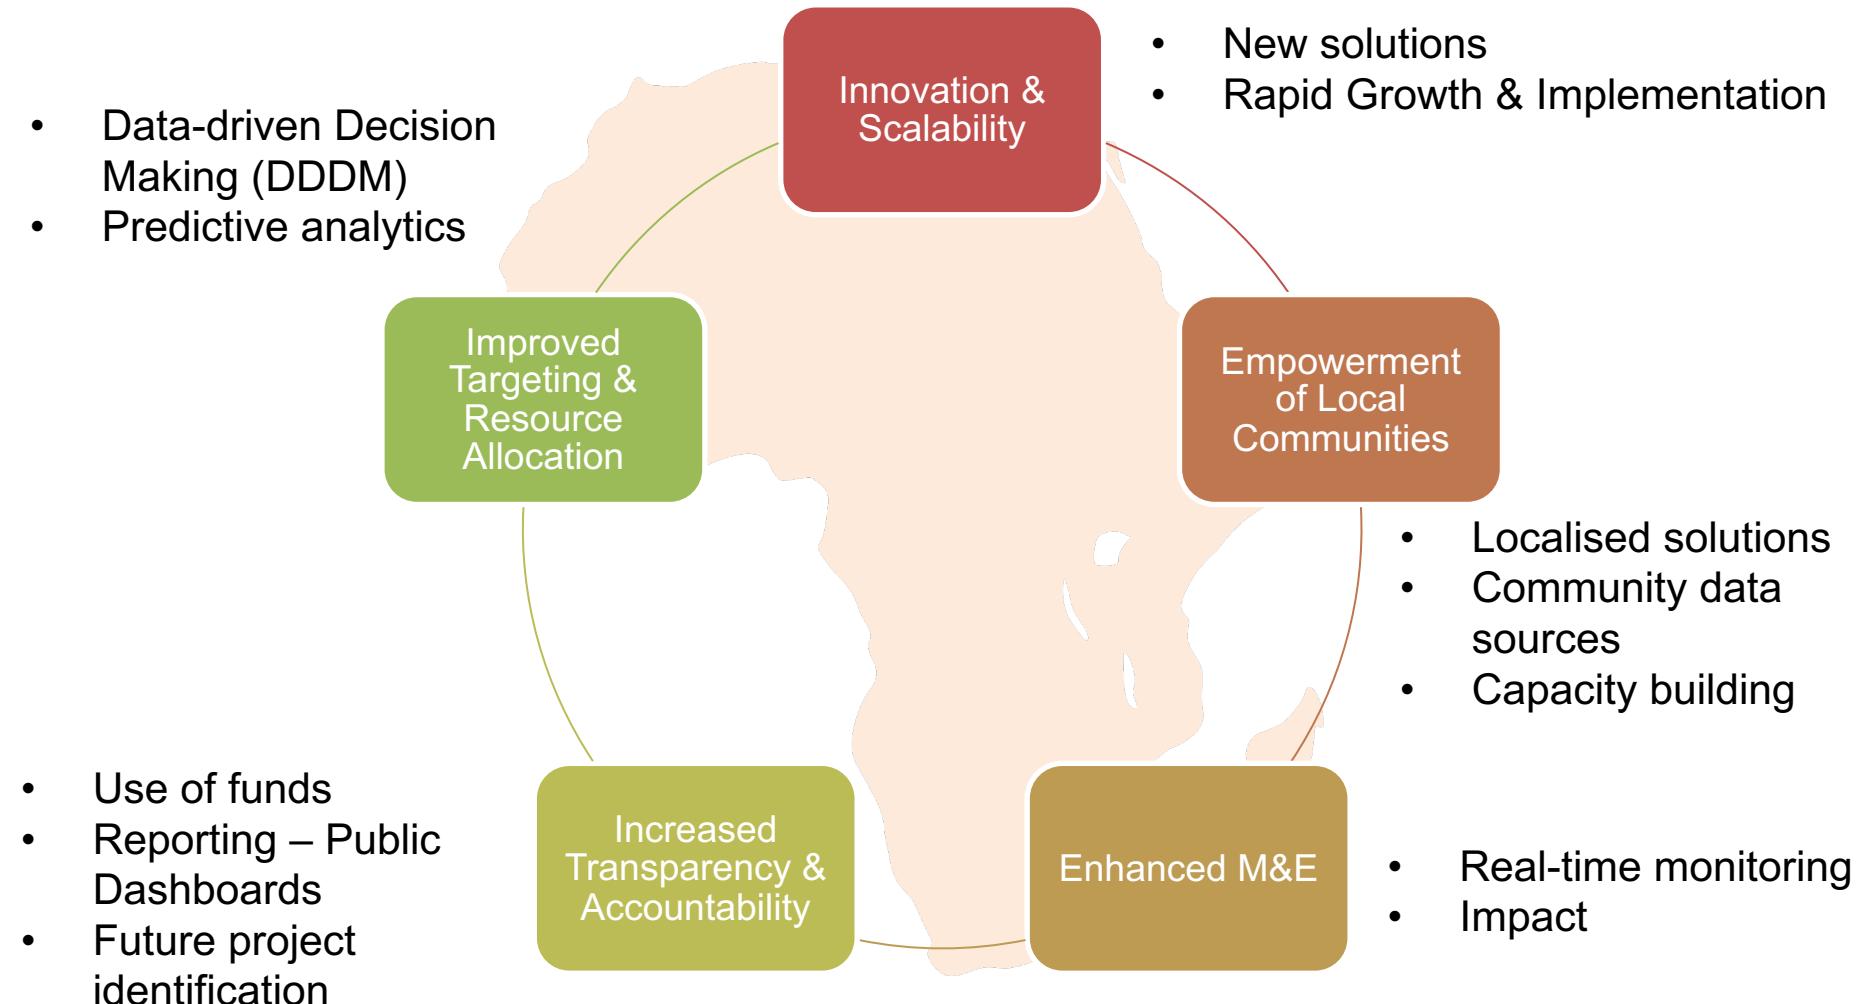

2. Approach & Methodology

2.2 Identified Challenges

Thematic Area	Identified Challenges
Availability of Data	<ul style="list-style-type: none">• Fragmented nature of data ecosystems• Quality – Incomplete and/or Outdated• Accessibility• Integrated data sets
Adoption of AI & Big Data	<ul style="list-style-type: none">• Adoption of AI & Big Data tools and techniques is just coming into existence SSA
Data Governance	<ul style="list-style-type: none">• Lack of localised, uniform, and/or sufficient policy frameworks• Data ownership & usage• Data Colonisation
Infrastructure	<ul style="list-style-type: none">• Access to internet is varied across the continent• Digital divide
Technical Skills & Capacity	<ul style="list-style-type: none">• Limited availability of skilled personnel – Management & Interpretation of complex data sets
Political & Socio-Cultural	<ul style="list-style-type: none">• Need for context-specific approaches – Complicates creation of integrated data sets• Approach to data collection, processing, & application

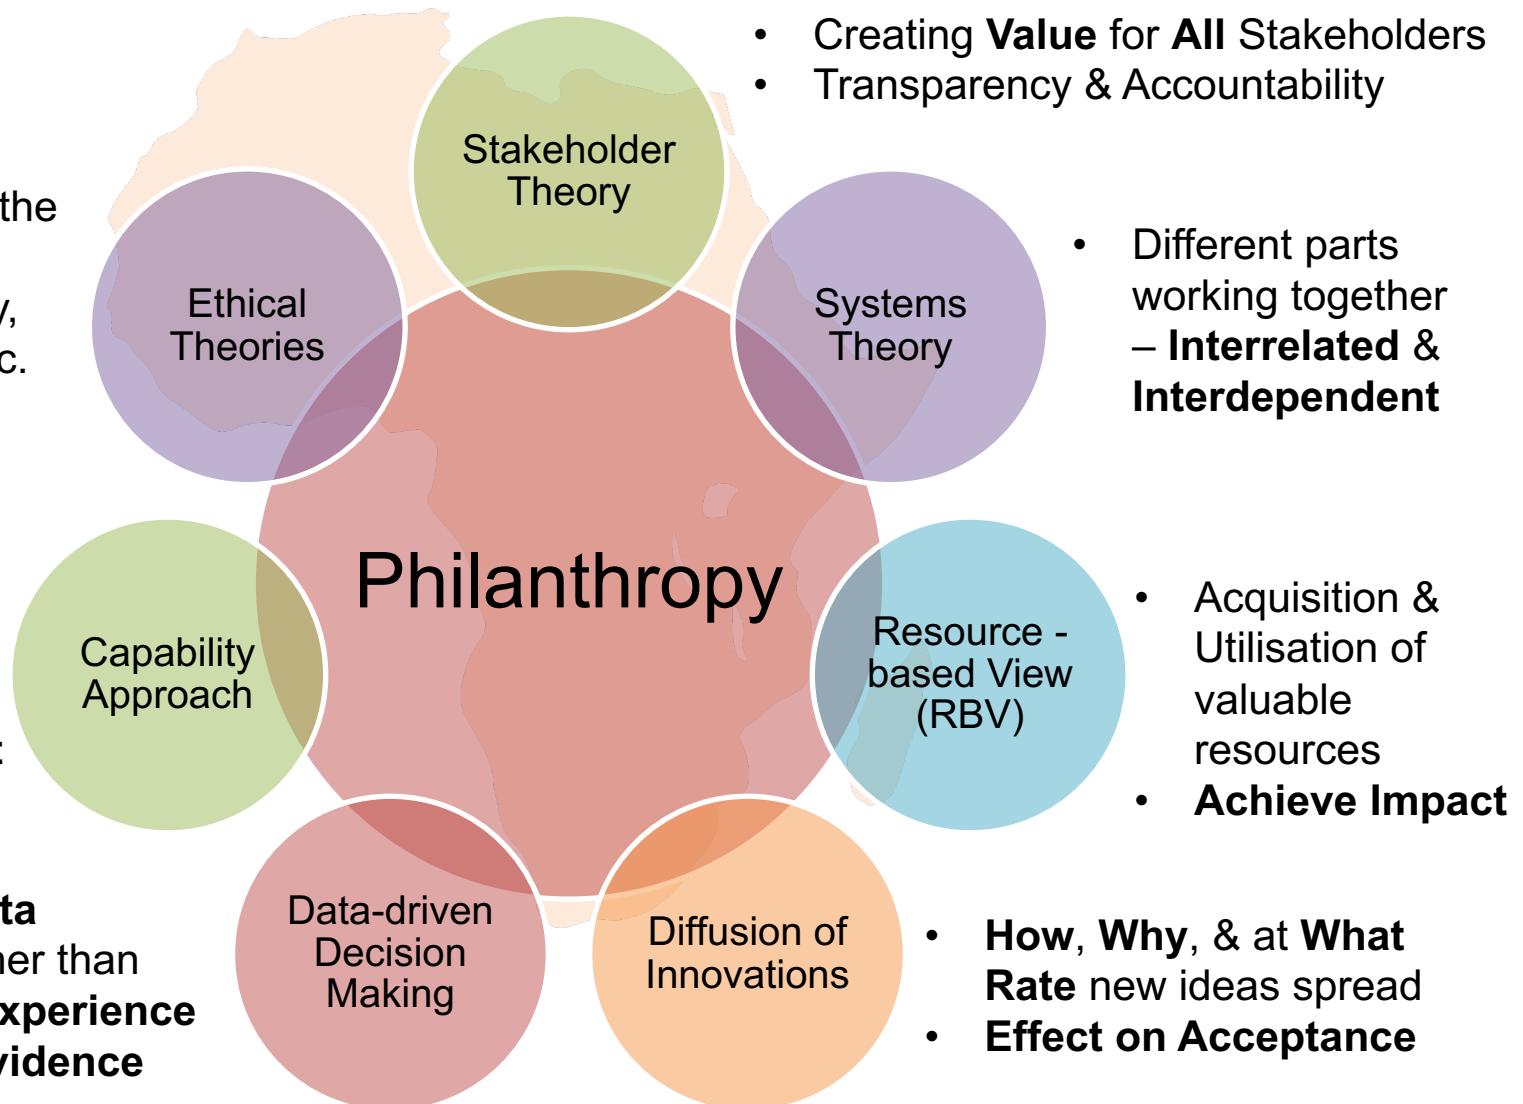

2.3 Theoretical & Empirical Review

5 Key Areas where AI & Big Data can make a significant difference

Multi-layered Theoretical Framework

- **Ethical Implications** in the use of collected data e.g. Privacy, Potential bias etc.

Key Concepts and Variables - How AI and Big Data can Impact Philanthropy

Relationships within the Dimensions of the Conceptual Framework

Relationship	Summary
Stakeholder Engagement & Outcomes	<ul style="list-style-type: none">Engaging all stakeholdersAlignment – Beneficiary needs vs. Stakeholder expectations
Data Utilisation & Technology Adoption	<ul style="list-style-type: none">Effective Data collection and analysisAppropriate solutionsSkills and capacity development
Technology Adoption & Stakeholder Engagement	<ul style="list-style-type: none">Awareness of proposed solutionsDemonstrate Value of Technology use
Ethical Considerations & Outcomes	<ul style="list-style-type: none">Data PrivacyBias MitigationEquitable AccessData Ownership
Feedback Loops	<ul style="list-style-type: none">Linked to all dimensionsM&E

2.7 Comparative Case Studies

Country	Overview	Focus Area & Applications
Uganda – Uganda Wildlife Authority	<ul style="list-style-type: none"> Predictive analysis – Poaching data, GPS, & ML Likelihood of poaching activity – Patrol effectiveness 	<ul style="list-style-type: none"> Environment & Conservation Extrapolation: <ul style="list-style-type: none"> Predicting spread of disease Predicting adverse weather conditions
Indonesia – VAMPIRE*	<ul style="list-style-type: none"> Data warehouses & Integrated data sets – Holistic EWS* for climate impact 	<ul style="list-style-type: none"> Impact of climate on vulnerable populations – Identify priority areas Relatable to disasters in SSA – Impact on women, youth, & children
Central Africa – UNICEF Magic Box	<ul style="list-style-type: none"> AI & ML tools and techniques – Outbreak of Zika and Ebola virus crises 	<ul style="list-style-type: none"> Insights to inform humanitarian responses – emergencies & epidemics
Indonesia – UN Global Pulse Lab	<ul style="list-style-type: none"> Real-time monitoring – Social media tracking 	<ul style="list-style-type: none"> Food price changes to understand potential humanitarian crises

*VAMPIRE - Vulnerability Analysis Monitoring Platform for Impact of Regional Events

*EWS – Early Warning System

5TH AFRICAN PHILANTHROPY CONFERENCE 2024

3. Findings, Discussions, & Conclusions

Leveraging AI & Big Data **will** support Philanthropy in Africa

- **Impact of “missing out” on AI & Big Data:**
 - **Africa being left behind!**
 - Diminished innovation and impact from Philanthropy – **Next Frontiers**
 - Reduced efficiency – **Allocation of limited resources**
 - Impact on skills development – **Doing Philanthropy the “Old fashioned way”**
- **Linking AI & Big Data to National Development Plans (NDP):**
 - **Philanthropy contributes to NDPs**
 - Philanthropy needs to be **aligned to development goals** – **Data is required!**
 - Need for **Data-Driven Decision Making (DDDM)**
 - Improved **philanthropic resource allocation** – **Impact**
 - **Proactive vs. Reactive** interventions
 - **Monitoring, Evaluation, Accountability, & Learning (MEAL)**

Shift Our Thinking about Philanthropy!

- **Use “what we know” to enhance Localised Philanthropic activities:**
 - Data driven decision making – **Communities have data**
 - Collaboration and networking – **Include marginalised groups**
 - Increased access to information – **Transparency**
 - Develop Linkages: **AI, Big Data, Ethics and Governance**
- **Addressing challenges - Inclusiveness and Responsibility:**
 - Bridge the **digital divide**
 - Data privacy regulations – **POPI Act**
 - Ethical considerations – **What is not intrusive?**
 - Appropriate technology – **Relevance to African Social challenges**
 - **Data Colonisation** – African data used to **resolve African challenges**
 - **Data Ownership** – **Ownership and Control** of data and its usage

5TH AFRICAN PHILANTHROPY CONFERENCE 2024

4. Q & A

5TH AFRICAN PHILANTHROPY CONFERENCE 2024
